SHINHAN SECURITIES

June 2022

[Vietnam Top Picks Universe]

Summary

- In May, VN-Index faced a downward trend in the first 2 weeks of the "Sell in May" month where there was a time the index touched its lowest record since March 2021, then the selling pressure reduced with the market bottom formed, decreasing in supply, and experiencing the lowest market volume ever since January of last year. However, the continuously below 20-day-average volume series of the market showed that the supply side has been drained, which resulted in the improvement of the VN-Index during the last 2 months of May. Moreover, the Government's ceaseless effort on security market enhancement, plus the upgrade of Vietnam's currency sovereign credit ratings from S&P Global Ratings, increasing to BB+ (stable outlook), played a pivotal role on the long-term sustainable growth of the Vietnamese market in the next few years.
- The VN-Index has been on the way back to test its nearest resistance of 1,300. Since the downtrend was the systematic risk affecting the whole market, and SSV's portfolio is based on fundamentals, we decided to keep SSV's portfolio in June the same as the one in May.
- The performance of our top 10 portfolio in 05/2022:
    - Portfolio – 18.9%
    - VN-Index – 5.42%
- The performance of our top 10 portfolio since 12/31/2021:
    - Portfolio – 23.0%
    - VN-Index – 13.7%
- Based on macro factors, market movements along with upcoming earning prospects, especially the 1H22 performance results will be reported, we will closely keep track and make reasonable adjustments towards SSV's portfolio, to optimize the return of our valued customers.

Investment points

- Short-term catalyst is included the increasing demand for meat, including pork and chicken (main products of Dabaco) due to Vietnamese traditional holiday.
- Growth potential to be highlighted: 1) improving 2022F margins as improving ASP thanks to new normal status; 2) higher livestock output as resuming normal business operation; and 3) stable raw materials from import tax exemption.
- Dabaco is expected to succeed in research the African Swine Fever (ASF) vaccine, which would mitigate the impacts of disease to its livestock production (accounted for 90.3% of sales in 2020).
- Diversification of real estates: Dabaco is expected to record revenue and profit of VND1.6 tn and VND400 bn, respectively, from two real estate projects named Lotus Central Bac Ninh (started handing over 4Q21) and Huyen Quang (expected handover in 2022).

Investment points

- Hoa Phat, top 1 of steel producers in ASEAN and top 50 in the world, has completed the value chain of steel industry, covering from mining iron ore, shipping over seas, and smelting cast iron to producing end-products such as HRC, construction steels, pipe steels, tole sheet steel, etc. This allows them to have great competitive advantages, including: 1) avoiding disruption of supply chain and production lines, 2) limiting the fluctuation of prices in raw materials and outputs to enhance profit margin, and 3) acquiring larger market share due to excellent reputation and various types of high-quality products.
- The Dung Quat 2 Complex will be launched from 1Q2022 and run with full capacity in 2025. Then, HPG will provide 8.6mn tonnes of HRC, surpassing Formosa to become the leader in Vietnam. HPG will also raise their total capacity to 14mn tonnes and thus generate tremendous revenue and profit.
- From 2022, Vietnam government will boost investment on public infrastructure to stimulate economy's growth (a new package of 150tn VND for 2022 besides the current package of 530tn VND). Furthermore, the real estate market is also expected to bounce back after the pandemic. This will motivate greater demand for steel consumption, ensuring 14mn tonnes of HPG's products to be fully absorbed in the next 5 years.
- HPG also planned to expand other businesses such as agriculture, real estate (residential property and industrial park), and container production, which will significantly contribute to their profit and growth in the future.

Investment points

- Global demand and spending for technology have dramatically increased, especially on software development and digital transformation (DX) services of FPT. FPT has been rapidly transforming into a global DX pioneer through self-developed B2B products applying the latest technologies such as Artificial Intelligence (AI), Robotic Process Automation (RPA), Blockchain, Cloud, and Internet of Things (IoT).
- The revenue growth of DX services (FSoft) and Made-by-FPT products (FIS) at roughly +40-50% p.a. will be the key growth driver of revenue and profit. Besides, the Telecom segment also significantly contributes to FPT's pre-tax margin and growth thanks to the new income from PayTV and Data Center as well as the high growth of Broadband services. These motivations and the investment into the Education segment and new startups such as BASE, Utop, and Sendo will ensure FPT to grow by at least +20% p.a. in the next 3-5 years.

Investment points

- With outstanding technological capabilities, DGC can produce all most products in the value chain - from mining apatite ore to producing final products. Thus, DGC can manage its material input cost well and is less dependent on the fluctuation of raw material prices.
- The expanding semiconductor production to meet the scarce supply for computers, phones, as well as 5G devices manufacturers around the world to push the demand for Phosphorus products.
- New source of growth from the Duc Giang Nghi Son chemical complex project with capex of VND12tn. The construction will be started in 1Q22, and completed phase 1 in Dec. 2024, and phase 2 until 2028. Management is confident that the factory can reach VND8.7tn in revenue and 1.8tn profit when phase 1 is completed.
- According to the consolidated 1Q/2022 FS of DGC, its revenue and profit after tax in the first quarter reached VND3,634bil and VND1,507bil, 86% and 418% increase QoQ, respectively. Selling price increased sharply while COGS only slightly increased to VND1,928bil, which resulted in the DGC's gross profit recorded at VND1,706bil, improved from 22% to nearly 47%. Profit after tax of the parent company also increased by 4.7 times, reaching VND1,335bil.
- Financial revenue increased by 2.5 times to 84 billion VND, mainly thanks to the interest from term deposits and realized gain from exchange currency.
- As of the end of March 2022, DGC had total assets of VND9,431bil, up 11% YTD. Its liabilities were VND1,820bil, owner's equity was VND7,611bil, having VND2,663bil of undistributed profit..

Investment points

- We believe that Mobile World is the leading retailer in Vietnam when operating more than 5,420 stores. This is a huge competitive advantage, helping MWG to implement the strategy of selling things that have never been sold.
- MWG's overall strategy in 2022 is to optimize the purchasing ability and invest in the activities of sales promotion, the customer services and the customer's shopping experience. Specifically,

+ TGDD/DMX will remain the Cash Cow business for MWG by: (1) adding new products/services to optimizing sales for existing stores, (2) opening new DMS (200 stores), new Topzone (40 stores) and expanding the network of freelancers, (3) implementing consumer electronics chains in oversea markets and (4) piloting new initiatives to prepare growth pillars for the future.
+ BHX will cease new store opening effort to focus on fine-tuning the backend and improving operational efficiency to be ready for scaling business nationwide since 2023. MWG plans to offer a private placement of up to 20% of its share capital; the money will be invested in distribution centers, fixed assets, technology, online sales channels and M&A deals. BHX is expected to contribute about 20% to total revenue.
+ An Khang pharmacy chain will be expanded rapidly in 2022 with the aim of becoming the top 3 largest pharmacy chains in Vietnam. As of February 2022, this chain has 208 pharmacies.

- Potential supporting factors: 1) The retail market recovers after the Covid-19 epidemic; assuming the social distancing scenario will not happen in 2022 2) Expanding investment into Indonesia market through Era Blue joint venture 3) Expanding An Khang pharmacy chain in 2022 4) The plan to offer up to 20% share capital of BHX is expected to help the market re-value the BHX chain in particular or the whole Mobile World Group in general.
- The risk of increasing global inflation will be able to affect the aggregate demand of the whole economy; reduces purchasing power and directly affects the sales of the retail industry.

Investment points

- PC1 holds outstanding construction technology in grid and wind power (such as UAV flying devices and crawler cranes for electric turbines).
- PC1 operates 7 hydropower plants with a total capacity of 169 MW, which is considered a strong cash cow. Their plants are located nationwide, avoiding the negative effects from clime changes, with stable revenue VND800bn/year with a gross margin of ~60%.
- Penetrating wind power with upcoming 150MW capacity COD in 4Q21, with favorable feed-in tariff and is expected to generate a profit of VND202bn (equivalent to 33% of 2022 net profit). Moreover, PC1 was also licensed to pre-feasibility study an onshore and offshore wind power with a capacity of +2,000 MW, securing stable growth over the next 5 years. Currently, PC1 is the only player who can build and operate their projects.

Investment points

- TV2 is a leading power consulting company in Vietnam, specializing in survey and design, and construction of electricity development and investment projects. TV2 is always on the top-list of power consultants for EVN and private developers (including Tri An, Ca Mau, Nhon Trach power plants). Consulting segment earns a stable cash flow ~VND150bn/year with a margin of ~20%.
- From 2019, TV2 has operated the high-tech operation center - remote power plants, which provide solid Operations and Maintenance services (O&M) to renewable plants. By end-2020, TV2's O&M services are operating 1,500 MW solar farms, with stable revenue of VND200bn/year with a margin of ~40%.
- They are also taking advantage of the tremendous domestic demand for electricity while there is a shortage of supply. TV2 is bidding for a potential backlog of ~USD900mn for projects with a total capex of USD5bn over the next five years, which mainly includes wind and LNG projects. They are also bidding for a giant LNG-fired project (Long Son complex-phase 1; USD1.3bn) and the Quang Tri coal-fired power plant (USD2bn).

Investment points

- Demand for industrial parks real estate in key economic regions of Vietnam will return to the growth trajectory in 2022 as well-tamed Covid-19 epidemic. Thus, industrial park real estate developers who have a large ready-to-lease land bank and are located in strategic locations will have a rapid rate of sales and benefit from rising real estate prices.
- SZC owns a large available for lease land bank (660 hectares) with competitive rental price in Ba Ria- Vung Tau, one of the key industrial centers in the South and is near convenient infrastructure clusters for such as, Cai Mep-Thi Vai port, Long Thanh International airport, Bien Hoa- Vung Tau expressway, and Phuoc An bridge.
- Chau Duc urban project was launced in the 2H21 after more than 10 years of delay due to prolonged legal procedures. Particularly, SZC is expected to sell 657 land plots and 1,213 apartments in phase 1 of the Sonadezi Huu Phuoc project (40.5 hectares).

Investment points

- We believe that Sacombank is being undervalued compared to its potential, due to the potential recovery of bad debts from the previous owners, and from the merger with Southern Commercial JSB.
- Sacombank is actively provisioning and handling VAMC bond debts from VND33tn in 2019 to VND25tn in 3Q21. We believe that given the high selling price of the real estate market, Sacombank can handle VAMC debt faster, creating a strong motivation for Sacombank's stock price and business results.
- Currently, Sacombank is a mid-range bank with no controlling shareholders and no foreign shareholders. We think that Sacombank can choose its strategic shareholders, which will be a strong motivation for share price.

Investment points

- Techcombank is the leading commercial bank in the retail segment for the middle and high-income customer segments. Techcombank is a bank leading the trend of strong investment in technology, creating many outstanding new products and services to meet the needs of high-end customers. Techcombank's strength is in providing financial services to large private conglomerate ecosystems in Vietnam (such as Vingroup and Masan).
- Techcombank maintains a high CASA ratio above 45% from 2020, the highest in the banking industry, and is expected to increase to 50% by 2025. We believe the ratio NIM continues to maintain a high level of ~5%-6% thanks to low funding costs and a high CASA ratio.
- Despite Covid-19 outbreak in Vietnam, Techcombank had relatively low NPL thanks to its quality customer portfolio. NPL ratio by end-3Q21 is 0.57%, the lowest in the banking industry.
- We believe Techcombank's business performance will keep growing strongly in coming 2022, thanks to the aggressive client base development via expanding margin loans book, advanced trading system and advanced products. TCB's valuation is relatively attractive at 2021F P/E of 10.3x and P/B of 1.9x
